

HAMILTON TRANSACTION KIOSK

As a business owner what is most important to you? Is it your customer's **Convenience**? The **Security** of the machine? Or, more **Marketing** capabilities? Now Hamilton offers you all three in one machine, the HTK.

## Convenience

WITH AN ARRAY OF PAYMENT & DISPENSING OPTIONS

Cash & Coins  
Tokens  
Dual Bill Dispenser  
Credit Card Acceptance  
Paypass

Hamilton Tokennotes®  
Customer Value Cards  
Coupon Codes  
Fleet Codes

For the business owners' convenience: The HTK offers access via the Internet to view and print audit reports, clear soft errors, change prices and display messages.

The credit card Paypass offers even faster through put at your business. The customer simply taps their credit card on the Paypass for a 3 to 4 second approval.

The HTK comes with a dual head credit card reader. This allows a credit card to be swiped in either direction, making the transaction easier for the customer.

The Dual Bill Dispenser gives the HTK the ability to dispense two different bill denominations or bills and Tokenotes®.

Dual hoppers in the HTK allow more change dispensing options. Dispense quarters, dimes, nickels, tokens or a combination of two different coin types. Dispense a Bonus Token for a free product along with change in bills or coins. Price your selections to the nickel, for example, \$12.95.

The coin acceptor in the HTK can accept six different coin types. The coins are collected in a coin box and do not replenish the coin hoppers.

If your place of business is located in an area with diverse languages, the HTK has bi-lingual capabilities. For example, it can be programmed with English and Spanish or English and French languages.

Loyal customers who have purchased Customer Value Cards can now go to the HTK to add value/recharge their cards.

Self-serve bay customers can obtain a receipt for their credit card transactions at the HTK.

The HTK comes with a communication call button. This can be wired to a system in an equipment room or office making it easier for customers to communicate any questions.

For the business owners' convenience: The HTK offers access via the Internet to view and print audit reports, clear soft errors, change prices and display messages.

The SmartXE Validator has serial communications and talks directly to the HTK controller. The benefit to the business owner is the elimination of training coupons for programming the Hamilton Tokenotes®. The Tokenote® codes are programmed in the controller and the SmartXE will accept them. If a customer tries to insert additional Tokenotes® for the same transaction, the SmartXE will no longer confiscate them. The Tokenote® will be returned to the customer for their next visit.

- ① High Security Door
- ② Security Camera
- ③ Exterior & Interior Locks
- ④ Password Protected
- ⑤ Separate Locked Cash Chamber

**Security**

With the added security features, the HTK offers more peace of mind.

#### High Security Door

Separate locked cash chamber  
Password Required/Protected

#### E-mail or Text Notifications

Heavy Duty Exterior & Interior Locks  
Security Camera

The HTK comes equipped with an alarm to deter tampering.

The door to the HTK is password protected. Owners may program the machine with exclusive usernames and passwords to give rights to enter the machine. If someone gains access to the machine without first inputting their password the alarm will sound. The HTK is capable of sending either an e-mail or text message notification of tampering.

With password protection the HTK is capable of giving a time stamped report that will show when and by whom the machine is accessed.

The HTK comes standard with heavy duty interior & exterior locks. The exterior door has two heavy duty Medeco® locks. The interior of the machine has a separate locking cash/coin chamber with a Medeco® lock.

With the cash and coins locked in an individual chamber you may have the interior lock keyed differently from the exterior locks. This will allow maintenance of the machine while keeping cash and coins secure, giving added peace of mind.

The new micro security camera is inconspicuous to the customer while giving you full view of anyone at the machine. It can be connected to a security system that is already in place or one that is added at a later date.

The brilliant display on the HTK is ideal for promoting other areas of your business.

## Innovation

PUT THE HTK TO WORK FOR YOU. THE CONTEMPORARY GRAPHIC DISPLAY OFFERS THE ABILITY TO INCREASE CUSTOMER LOYALTY, PROMOTE DIFFERENT AREAS OF YOUR BUSINESS AND CROSS ADVERTISE WITH BUSINESSES AND CHARITABLE ORGANIZATIONS IN THE AREA.

### FEATURES:

- SmartXE Bill Validator
- Bill Stacker
- Coin Acceptor
- Credit Card Acceptance
- Receipt Printer
- Paypass
- Dual Hoppers
- Communication Call Button
- Security Camera
- Alarm
- Password Protection
- Interior/Exterior Medeco® Locks
- Graphic Display

### OPTIONS:

- \*Coinco Validator
- \*CashCode Validator

\*Tokenote® acceptance not available with third party validators

- Custom Graphic Display
- Still photos
- Coupon Codes
- Video
- Special event times & pricing
- Customer Value Cards/Tokenotes®

The brilliant display on the HTK is ideal for promoting other areas of your business. Take advantage of a variety of marketing & advertising opportunities with the ability to download still photos, promotional messages, video, and your own custom graphics to the machine. Cross promotions with a neighboring business or an area charity can be as easy as a download to the HTK.

Customer Value Cards and Tokenotes® are an excellent way to create customer loyalty. The Value Cards can be used either as a fleet card or prepaid gift card. If you are using them as gift cards, they are rechargeable at the HTK. Tokenotes® are a paper coupon and can be used

for a discounted or free service. Tokenotes® can be dispensed at the HTK in place of or with cash back after a service has been purchased. The HTK graphic display is an excellent way to let your customers know that you have Tokenotes® and Customer Value Cards available.

The HTK can be programmed with an unlimited number of Coupon Codes. The customer enters the code at the HTK and receives a discounted or free service that has been programmed to match that code. Advertising codes in a local newspaper, on a flyer, or your website for a specific service will help attract new customers to your location.

If there are special events in the area, event times and pricing can be programmed into the HTK. The HTK allows you to program up to seven time sensitive pricing events. This feature gives the HTK the ability to automatically change the prices, coupon values, welcome prompts, and external display messages based on the time of day and day of the week.
